Charles K. With an inspiring location, top-notch talents, cutting-edge laboratories, and world-class professional services, Science Park provides the ideal environment for the development of revolutionary technological ideas that deliver social and economic benefits.

Managed by Hong Kong Science and Technology Parks Corporation (“HKSTP”), the Park is committed to promote the development of five key areas: Electronics; Information Communications Technology (ICT); Green Technology; Biomedical Technology; and Material and Precision Engineering. Through these pillars, we have helped to reinforce Hong Kong’s position as a regional innovation and technology hub. Science Park is not just a great place to start a business; it is also a world-class destination for corporate meetings and MICE events where attendees can ignite brilliant new ideas in an inspirational environment.

Science Park is situated in Sha Tin on 22 hectares adjacent to the magnificent Tolo Harbour waterfront as both a bustling technology and innovation center as well as a peaceful oasis. We have a range of both indoor and outdoor facilities that can be customised for any type of event, including meeting rooms, conference halls, exhibition hall, and a unique open-air amphitheatre. Our venues feature fiber-optic and WiFi connectivity, high-resolution screens and projectors, video conferencing options and other multi-media equipment. Science Park also have ample of parking facilities, ATMs, and a number of on-site retail shops and eateries to provide a one-stop-shop for event organisers and participants. Besides top-notch facilities, Science Park also provides world-class services. We pride ourselves on offering bespoke service to different enterprises and are committed to create a truly memorable experience for our clients.

Phase 1 and 2 of Science Park have been the breeding ground of numerous innovations over the last decade, and the newly opened Phase 3 further expands our infrastructure to cement our reputation as one of the best MICE venues in Hong Kong. The facilities in Phase 3 add 3,200 square meters of MICE venues to the property, while also striving for being carbon-neutral over its lifetime. This development was recognised for its green features with the “2014 Grand Award in Green Building Design” by the Hong Kong Green Building Council and provides the space for the perfect corporate event.
